

Lists

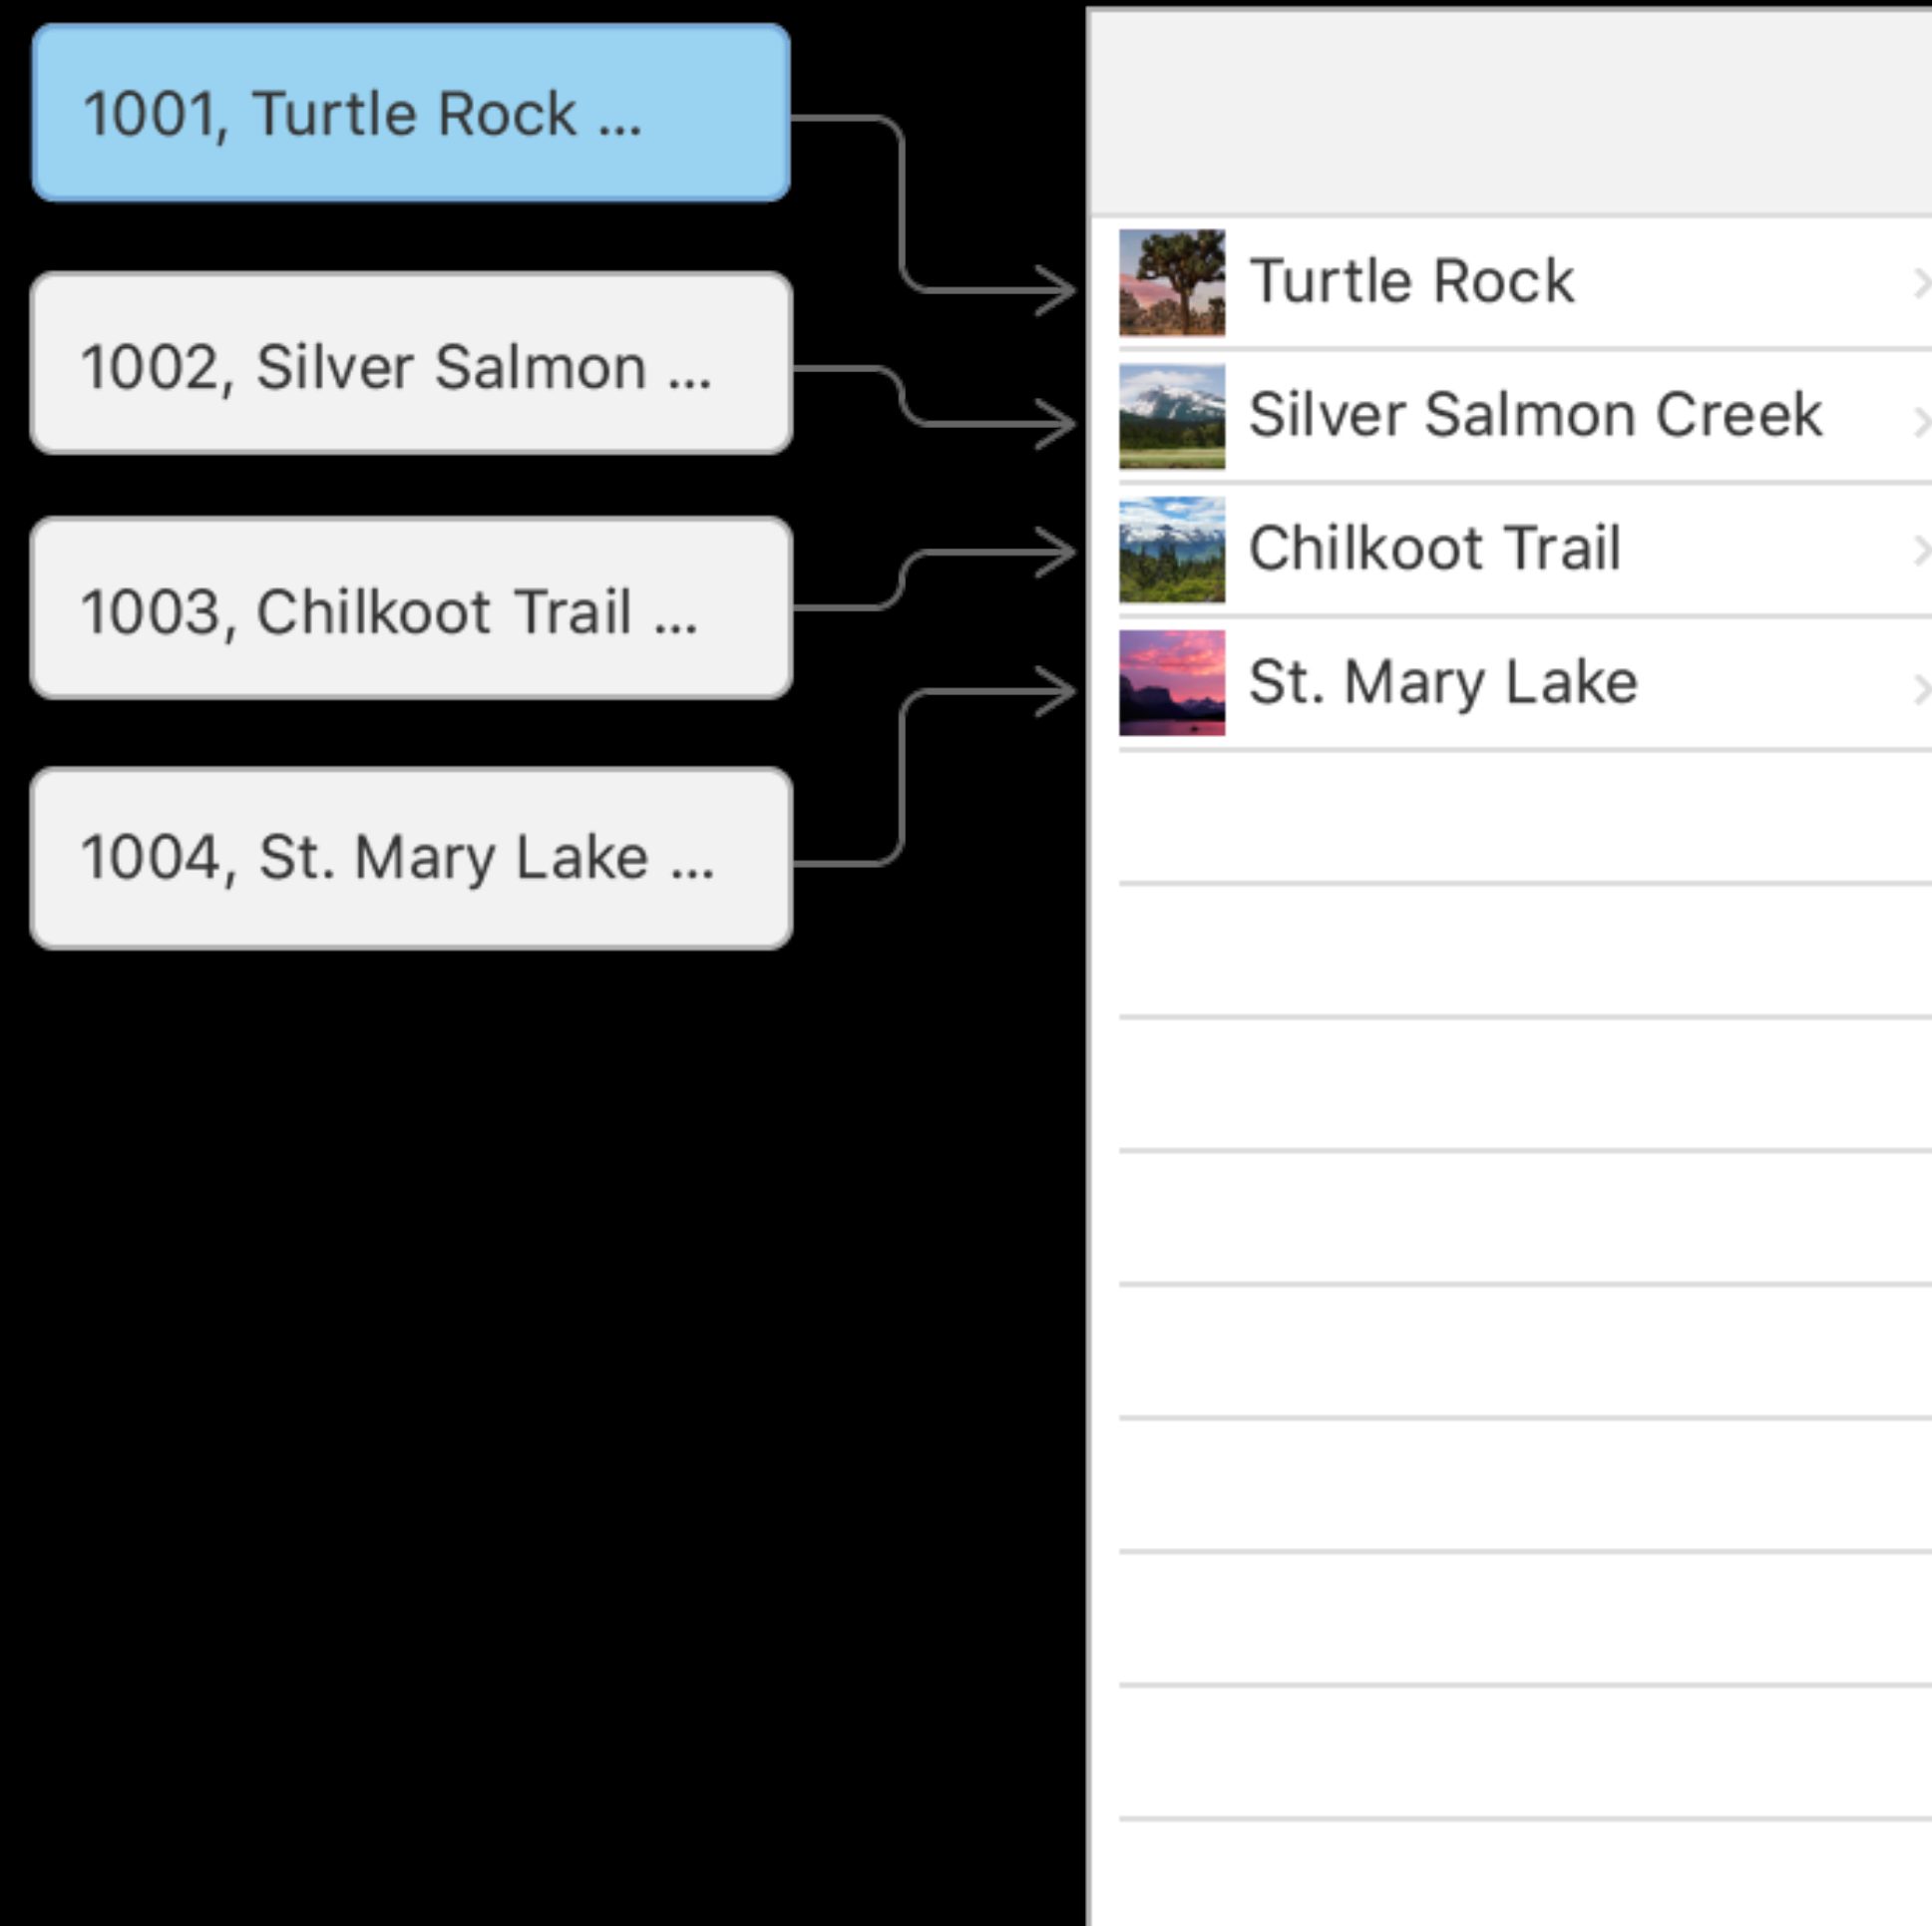

“Lists are everywhere.”

–*Steve Jobs*

Listes dynamiques

Listes dynamiques

Listes dynamiques

Model de donnée
Struct

```
struct Album: Identifiable {  
    var id = UUID()  
    var name: String  
}
```

Listes dynamiques

Listes dynamiques

Source Données
Tableau

```
struct ContentView: View {  
    var albums = [  
        Album(name: "1999"),  
        Album(name: "Desire"),  
        Album(name: "Hello Sunshine")  
    ]  
    ...  
}
```

Listes dynamiques

List

```
struct ContentView: View {  
    var albums = [  
        Album(name: "1999"),  
        Album(name: "Desire"),  
        Album(name: "Hello Sunshine")  
    ]  
  
    var body: some View {  
        List(albums) { album in  
            Text(album.name)  
        }  
    }  
}
```

1999

Desire

Hello Sunshine

Listes dynamiques

List

```
struct ContentView: View {  
    var albums = [  
        Album(name: "1999"),  
        Album(name: "Desire"),  
        Album(name: "Hello Sunshine")  
    ]  
  
    var body: some View {  
        List(albums) { album in  
            Text(album.name)  
        }  
    }  
}
```

1999

Desire

Hello Sunshine

Listes dynamiques

List

```
struct ContentView: View {  
    var albums = [  
        Album(name: "1999"),  
        Album(name: "Desire"),  
        Album(name: "Hello Sunshine")  
    ]  
  
    var body: some View {  
        List(albums) { album in  
            Text(album.name)  
        }  
    }  
}
```

En Swift : `for` album in albums

1999

Desire

Hello Sunshine

ForEach

```
struct ContentView: View {  
  
    ...  
  
    var body: some View {  
        VStack {  
            →ForEach(albums) { album in  
                Text(album.name)  
            }  
        }  
    }  
}
```

1999
Desire
Hello Sunshine
