Stacks

HStack

Positionne les views selon un axe horizontal (de gauche à droite)
```swift
//
//  ContentView.swift
//  StacksLive
//
//  Created by Yannis Lang on 22/10/2021.
//

import SwiftUI

struct ContentView: View {
    var body: some View {
        HStack {
            Rectangle()
                .fill(Color.blue)
            Rectangle()
                .fill(Color.white)
            Rectangle()
                .fill(Color.red)
        }
    }
}

struct ContentView_Previews: PreviewProvider {•••}
```
VStack

Positionne les views selon un axe vertical (de haut en bas)

```swift
//
//  ContentView.swift
//  StacksLive
//
//  Created by Yannis Lang on 22/10/2021.
//

import SwiftUI

struct ContentView: View {
    var body: some View {
        VStack {
            Rectangle()
                .fill(Color.blue)
            Rectangle()
                .fill(Color.white)
            Rectangle()
                .fill(Color.red)
        }
    }
}

struct ContentView_Previews: PreviewProvider {●●●}
```

ZStack

Superpose les views (de l'arrière de plan vers le premier plan)
```swift
//
//  ContentView.swift
//  StacksLive
//
//  Created by Yannis Lang on 22/10/2021.
//

import SwiftUI

struct ContentView: View {
    var body: some View {
        ZStack {
            Rectangle()
                .fill(Color.blue)
            Ellipse()
                .fill(Color.white)
            Circle()
                .fill(Color.red)
        }
    }
}

struct ContentView_Previews: PreviewProvider {●●●}
```
